

## Installation Observium debian 12

## Sommaire :

- 1- Prérequis
- 2- Installation

# Configuration serveur Observium

# 1- Prérequis

Obersivum est une plateforme qui permet de centraliser et d'analyser les données de manière efficace. Elle est essentielle pour optimiser les processus décisionnels et améliorer la performance globale d'une organisation.

## 2- Installation :

## Commençons par un update :

```

_,met$$$$$gg.
,g$$$$$$$$$$$$$P.
,g$P"" ""Y$.
,$$P' `$$$
',$$P ,ggs. `$$b:
'd$$' ,p"" . $$$
$$P d'$ , $$P
$$: $$ - ,d$$'
$$\; Y$b._ ,dP'
Y$$ . "Y$$$$p"
`$$b "-. _
`Y$$
`Y$$
`$$b.
`Y$b.
`"Y$b._
      ^^^^^

```

```

root@vbox:~# apt update

```

Obersvium propose un script pour faciliter et automatiser son installation.

# Configuration serveur Observium

**wget http://www.observium.org/observium\_installscript.sh**

```
root@vbox:~# wget http://www.observium.org/observium_installscript.sh|
```

Puis on rend exécutable le fichier :

**chmod +x observium\_installscript.sh**

```
root@vbox:~# chmod +x observium_installscript.sh|
```

Puis on exécute :

```
root@vbox:~# ./observium_installscript.sh|
```

Quand le script se lance nous avons le choix de plusieurs options dans notre cas nous allons choisir la 1 (version gratuite)

The logo consists of the word "Observium" in a stylized, blocky font made of ASCII characters. The 'O' is a square with a circle inside, and the 'i' has a dot. The letters are composed of vertical and horizontal lines.

Welcome to Observium installation script v0.3.1

Please select the version of Observium you would like to install

1. Observium Community Edition
  2. Observium Pro/Ent Edition **stable** (requires account at <https://www.observium.org/>)
  3. Observium Pro/Ent Edition **rolling** (requires account at <https://www.observium.org/>)
  4. Install the UNIX-Agent
  5. Install the SNMPD (snmpd-config will be overwritten)
  6. **Remote poller** for Observium Pro/Ent Edition **stable** (requires account at <https://www.observium.org/>)
- (1-6): |

# Configuration serveur Observium

Le script va installer et configurer toute les dépendances nécessaire a cette étape il faut choisir un mdp pour le serveur SQL :

```
Requested installing Observium CE

[*] No MySQL server was detected on this server. Installing MySQL...
Choose a MySQL root password
```

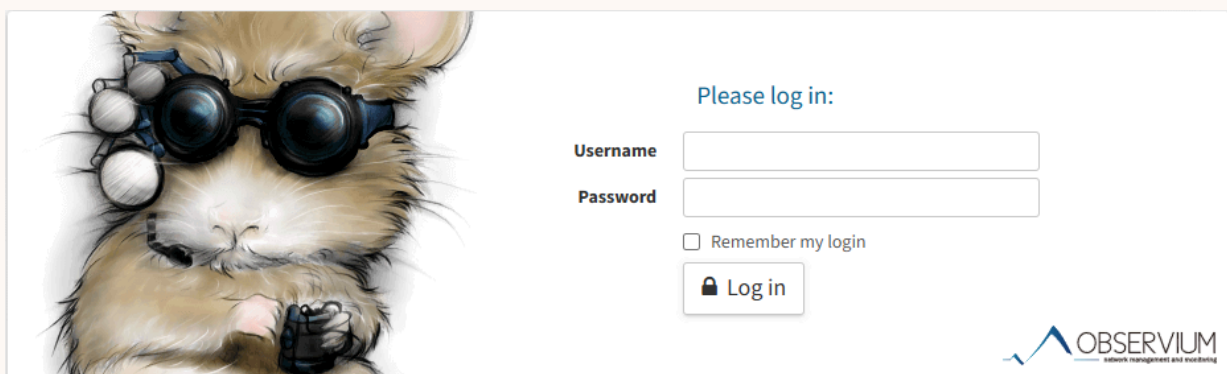

Puis un user / mdp pour accéder au observium

```
[*] Apache version is 2.4, creating config...
Enabling module rewrite.
To activate the new configuration, you need to run:
    systemctl restart apache2
AH00558: apache2: Could not reliably determine the server's fully qualified domain name, using 127.0.1.1.
rName' directive globally to suppress this message
[*] Create first time Observium admin user..
Username: sacha
Password:
```

Entrez oui pour installer le démon sur la machine  
(attention cela supprimera la conf snmp existante si elle existe)

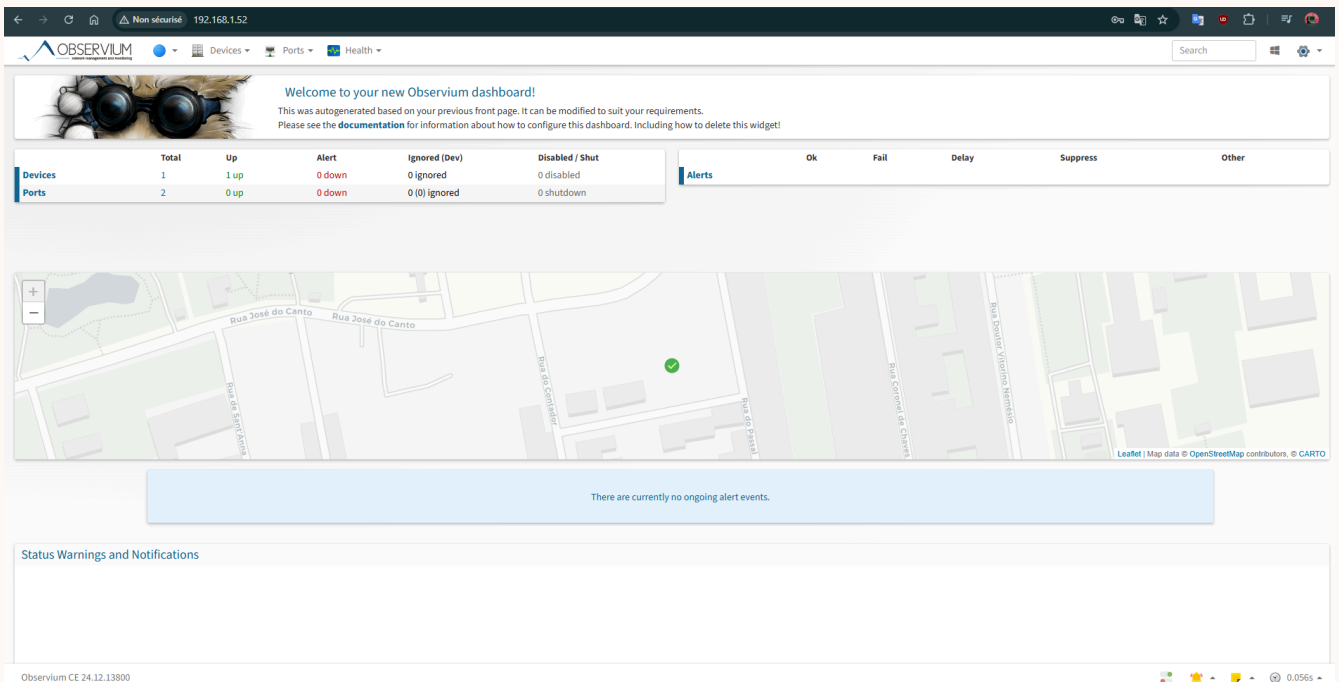

```
[*] Creating Observium cronjob...
Would you like to install/configure SNMP daemon and
```

Puis on entre l'ip dans un navigateur

The image shows the Observium login interface. On the left is a cartoon illustration of a hamster wearing goggles and holding a camera. On the right, under the heading "Please log in:", there are input fields for "Username" and "Password". Below these fields is a checkbox labeled "Remember my login" and a "Log in" button with a lock icon. The Observium logo, featuring a stylized blue mountain and the text "OBSERVIVUM network management and monitoring", is in the bottom right corner.

# Configuration serveur Observium

Entrez l'identifiant et mot de passe choisis précédemment.

The screenshot shows the Observium web interface. At the top, there's a navigation bar with tabs for 'Devices', 'Ports', and 'Health'. Below this, a welcome message states: 'Welcome to your new Observium dashboard! This was autogenerated based on your previous front page. It can be modified to suit your requirements. Please see the [documentation](#) for information about how to configure this dashboard. Including how to delete this widget!'. A summary table follows:

	Total	Up	Alert	Ignored (Dev)	Disabled / Shut
Devices	1	1 up	0 down	0 ignored	0 disabled
Ports	2	0 up	0 down	0 (0) ignored	0 shutdown

Below the table is a map showing a street view with a green checkmark icon. A blue box below the map states: 'There are currently no ongoing alert events.' At the bottom, there's a section for 'Status Warnings and Notifications' which is currently empty. The footer shows 'Observium CE 24.12.13800' and a timestamp '0.056s'.

Nous sommes donc bien sur observium prêt pour accueillir des postes/switch/serveur..
